

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple :  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{23}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{3}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{9}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{14}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{12}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{5}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{8}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{11}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{6}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{5}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple :  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{10}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{6}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{7}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{22}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{16}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{14}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{8}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{7}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{21}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{3}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{7}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{10}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{5}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{9}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{18}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{9}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{5}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{11}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{8}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{16}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{11}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{19}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{5}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{9}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{10}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{7}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{13}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{17}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{3}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{18}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple :  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{4}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{17}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{15}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{5}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{9}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{8}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{7}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{11}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{13}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{6}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{17}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{9}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{7}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{11}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{3}{2} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

# Les fractions

Transforme *la fraction simple* en  
*un nombre entier + une fraction.*

Exemple :  $\frac{17}{3} = 5 + \frac{2}{3}$

$$\frac{13}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{16}{3} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{16}{5} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$

$$\frac{15}{4} = \boxed{\phantom{00}} + \frac{\phantom{00}}{\phantom{00}}$$
