

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$0,35 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$8,77 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$9,20 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$25,04 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$435,78 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$1\,999,99 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$156,89 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$109,45 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$4,25 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$12,29 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$2,35 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$9,56 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$15,27 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$3,53 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$4,03 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$25,21 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$3,56 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$13,25 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$2,13 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$129,38 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$12,5 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$2,45 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$6,66 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$1,78 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$2,56 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$6,1 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$0,75 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$1,24 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$0,98 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$1,45 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$142,6 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$69,82 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$29,45 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$7,65 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$737,37 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$303,3 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$896,25 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$65,47 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$138,19 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$476,52 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$76,5 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$96,25 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$0,46 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$4,6 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

## Les nombres décimaux en entier plus fraction

$$= 2 + 0,58 = 2 + \frac{5}{10} + \frac{8}{100}$$

$$9,54 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$14,3 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$7,64 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$

$$49,8 = \square + \square = \square + \frac{\quad}{\quad} + \frac{\quad}{\quad}$$
