

Les puissances

$$6^2 \div 6^4 = \square \circ \square = \square$$

$$8^{11} \times 8^3 = \square \circ \square = \square$$

$$2^{10} \div 2^5 = \square \circ \square = \square$$

$$4^2 \times 4 = \square \circ \square = \square$$

$$5^4 \times 5^9 = \square \circ \square = \square$$

Les puissances

$$4^7 \div 4^2 = \square \circ \square = \square$$

$$7^8 \div 7^6 = \square \circ \square = \square$$

$$6^3 \div 6 = \square \circ \square = \square$$

$$2^3 \times 2^8 = \square \circ \square = \square$$

$$3^{10} \times 3^6 = \square \circ \square = \square$$

Les puissances

$$9^{12} \times 9^7 = \square \circ \square = \square$$

$$3^5 \times 3^9 = \square \circ \square = \square$$

$$4^{15} \div 4^8 = \square \circ \square = \square$$

$$7^{10} \times 7^4 = \square \circ \square = \square$$

$$5^9 \div 5^6 = \square \circ \square = \square$$

Les puissances

$$9^{-6} \times 9^7 = \square \circ \square = \square$$

$$5^3 \div 5^9 = \square \circ \square = \square$$

$$2^{-8} \div 2^6 = \square \circ \square = \square$$

$$8^9 \times 8^2 = \square \circ \square = \square$$

$$3^7 \div 3^8 = \square \circ \square = \square$$

Les puissances

$$3^{-4} \div 3^7 = \square \circ \square = \square$$

$$6^8 \times 6^5 = \square \circ \square = \square$$

$$5^{10} \times 5^8 = \square \circ \square = \square$$

$$9^{-5} \times 9^7 = \square \circ \square = \square$$

$$2^{-7} \div 2^{10} = \square \circ \square = \square$$

Les puissances

$$7^2 \times 7^9 = \square \circ \square = \square$$

$$3^{-4} \div 3^3 = \square \circ \square = \square$$

$$7^{-2} \div 7^6 = \square \circ \square = \square$$

$$6^3 \div 6^{10} = \square \circ \square = \square$$

$$4 \times 4 = \square \circ \square = \square$$

Les puissances

$$5^{-4} \div 5^8 = \square \circ \square = \square$$

$$7^6 \times 7^4 = \square \circ \square = \square$$

$$2^{-9} \div 2^7 = \square \circ \square = \square$$

$$8^{-4} \times 8^9 = \square \circ \square = \square$$

$$4^8 \times 4^5 = \square \circ \square = \square$$

Les puissances

$$8^4 \times 8^6 = \square \circ \square = \square$$

$$2^2 \times 2^9 = \square \circ \square = \square$$

$$5^{-7} \div 5^2 = \square \circ \square = \square$$

$$6^{-5} \div 6^3 = \square \circ \square = \square$$

$$9^3 \div 9^5 = \square \circ \square = \square$$

Les puissances

$$4^5 \times 4^7 = \square \circ \square = \square$$

$$9^{-6} \div 9^2 = \square \circ \square = \square$$

$$3^8 \times 3^3 = \square \circ \square = \square$$

$$5^{-6} \times 5^{10} = \square \circ \square = \square$$

$$2^{-8} \div 2^7 = \square \circ \square = \square$$

Les puissances

$$4^6 \div 4^4 = \square \circ \square = \square$$

$$8^{-3} \div 8^5 = \square \circ \square = \square$$

$$6^6 \times 6^9 = \square \circ \square = \square$$

$$9^{-4} \div 9^7 = \square \circ \square = \square$$

$$7^8 \times 7^7 = \square \circ \square = \square$$

Les puissances

$$6^{-2} \times 6^5 = \square \circ \square = \square$$

$$8^{-6} \times 8^2 = \square \circ \square = \square$$

$$2^4 \div 2^5 = \square \circ \square = \square$$

$$5^3 \times 5^{10} = \square \circ \square = \square$$

$$7^{-9} \div 7^5 = \square \circ \square = \square$$

Les puissances

$$9^3 \times 9^8 = \square \circ \square = \square$$

$$6^7 \div 6^4 = \square \circ \square = \square$$

$$4^{-9} \div 4^3 = \square \circ \square = \square$$

$$3^{-8} \times 3^2 = \square \circ \square = \square$$

$$8^9 \div 8^2 = \square \circ \square = \square$$
